

The small parts that turn the wheels of the industry

Indo-MIM - serving the demanding needs of the automotive industry

The automotive industry demands parts with high performance and even higher reliability at a competitive cost and Indo-MIM is here to meet this challenge. We are a leading and trusted global supplier of many critical MIM components for the automotive industry in a wide variety of vehicle safety, fuel system, powertrain and interior applications. Indo-MIM has developed extensive manufacturing capabilities and that services these needs. Our expansive facilities and world-class manufacturing team can capably manage the large volume MIM needs for automotive OEMs.

Partnering for success

Indo-MIM forges solid partnerships with our customers so that we can provide maximum value over the life of a program. We meticulously plan a project with a select team dedicated to the program from beginning to end. Our APQP process is among the best in the business. It assures that we have adequate resources to bring the project in on time and with a smooth launch.

Quality is engineered into every product

Our automotive ISO/TS 16949:2002 certified quality system demands excellence from our people and operations. Quality is no accident. It is thoughtfully planned with our customers and executed by every member of our team. Our ASQ certified Lean Six Sigma team members continuously strive to improve every aspect of our operations. We are not satisfied until you are satisfied.

Running lean

Lean operations drive the pace of our automotive manufacturing philosophy. We partner with our customers to develop a responsive and flexible supply chain. Our cost effective tooling capability offers the ability to plan for excess production capacity which allows us to quickly adapt for surges in demand. This in turn reduces risk and lessens inventory for lower cost.

Advanced materials for tomorrow

Technology is evolving at a rapid pace and Indo-MIM is there with material options that allow our customers to achieve that next level of performance. Besides a vast array of off-the-shelf material solutions for heat, wear and corrosion resistance as well as magnetic applications, Indo-MIM maintains a world-class materials laboratory to develop a custom solution for your most demanding products.

Providing a total solution

Indo-MIM continues to invest in not only the latest MIM technology, but also the most advanced capabilities in finish machining, heat-treating, and performance surface coating. We believe the job is not complete until you have a drop in solution delivered to your door.

MIM automotive product solutions:

Safety Systems: Sensor housings, braking & ABS components, seat belt mechanisms

Fuel Systems: Injector nozzles, armatures, housings

Interior Systems: Seating mechanisms, cosmetic products

Powertrain: Turbocharger vanes and components, hydraulic spools, rocker arms

Electrical Systems: Connectors, heat sinks

Indo-MIM automotive capabilities:

- Product design and material selection assistance
- Prototyping and low volume development
- High volume MIM production
- Automated manufacturing & inspection
- Precision grinding and CNC machining
- Heat-treating, plating and surface coatings
- Plastic insert molding
- Assembly and integration

For proven, expert, cost-effective MIM solutions, delivered with strict adherence to deadlines, do contact us at www.indo-mim.com
